Greetings,

I am reaching out to you today to briefly summarize the academic supports that will be offered to your student while they are out due to COVID quarantine or illness. Your student's teachers will upload asynchronous work and assignments to Schoology and your child will have access to support by a classroom teacher on Google Meet. The teacher can help with the work assigned in Schoology by the classroom teacher and help practice grade level skills.

To access virtual instruction, please use the schedule outlined below. All teachers can assist students with any of their classes. The teacher content area is listed, but if the tutoring time does not fit the student's schedule, they can join the Google Meet Tutoring with any teacher.
